Are You Prepar3D®?

Training meets reality with Lockheed Martin's Prepar3D® simulation software. Private pilots, commercial organizations, militaries and academia rely on Prepar3D for immersive, experiential learning.

Prepar3D (pronounced "prepared") is a visual simulation platform that allows users to create training scenarios across aviation, maritime and ground domains. Users can train anywhere in the virtual world, from underwater to sub orbital space.

Prepar3D furthers the development of Microsoft® ESP™ while maintaining compatibility with Microsoft Flight Simulator X, allowing many thousands of add-ons to be used within Prepar3D.
